Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Claims 4-7 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 8-22-06.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Evans in view of Taitel et al and Day.

Evans discloses a connection member comprising front and rear plates 10 interconnected via nut and bolts arrangements 12-14, and plural passages (see figures 1-5) defined therebetween for receiving tubes or posts 16.

Claims 1-3 have been treated as subcombination claims. The structure of the treadmill has not been positively recited. It is well recognized that treadmill possess upright posts for user support and for control purposes. Taitel et al teaches a tubular uprights having handles and a control panel. Posts come in different sizes and arrangements. The examiner contends that it would have been obvious to one skilled in the art to utilize the Evans connection member with a Taitel et al type treadmill for interconnecting treadmill posts for stability purposes, as exemplified by the Day connection members.

As to claim 2, note the flanges 42 of Evans.

Art Unit: 3764

4. Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Evans in view of Taitel et al and Day as applied to claim 1 above, and further in view of Schrader.

Schrader discloses tubes having internal threads and bolts for threadedly connecting to the tubes. See figure 5. Given this teaching, it would have been obvious to one skilled in the art to modify the Evans nut and bolt arrangement by utilizing the well recognized threaded tubes connection means as an alternative means to interconnect the front and rear plates.

Claim Rejections - 35 USC § 112

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

6. Claims 1-3 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1 line 2, "from two bases items" is awkward and cannot be understood.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
